

# Real-time legal guidance for drivers.

## WHAT IS TURN SIGNAL?

TurnSignal is a Black-owned mobile app that allows drivers to chat face-to-face with an attorney when they're pulled over or in an accident. Our attorney partners are experts in personal injury and criminal law and trained to help ease anxiety and reduce tension during these interactions. TurnSignal helps attorneys reach new clients while doing good in their community, all from the comfort of their home or office.

**TurnSignal's mission is to protect drivers' civil rights, de-escalate roadside interactions, and ensure both drivers and law enforcement officers return home safely.**

## HOW TURN SIGNAL WORKS

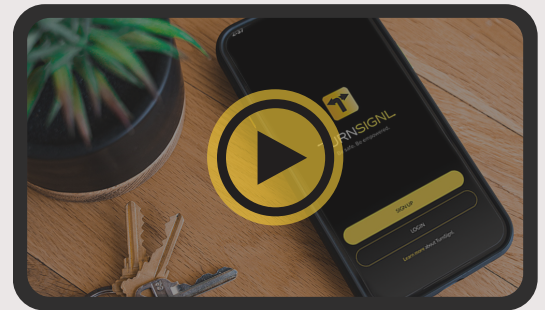

When a driver is in an accident or stopped by law enforcement, they launch the TurnSignal app with one click or a voice command. The app immediately begins to record the interaction, and connects the driver to an attorney with real-time video.

The on-screen attorney provides legal and de-escalation guidance during the encounter. After the interaction, attorneys are available to discuss future legal action, if needed. Recorded data is stored in the cloud and made available for the user to download.

## SUBSCRIPTION PLANS:

Joining TurnSignal is a perfect way for attorneys to support members of their community in the moments that matter most – and to establish an immediate trusted advisor relationship with each new interaction. Take advantage of positive press and promotional opportunities, and receive qualified leads!
